

MSEIA SOLAR REPORT FOR NEW JERSEY SEPTEMBER 2016 SUMMARY

Strategic Highlights

Delaware Renewable Energy Task Force held a meeting to discuss solar subsidies. At the task force's September 7 meeting, the Delaware Public Advocate recommended an end to the SREC auction process, and to limit SREC procurement from new PV systems sized up to 25kW, to one-third of Delmarva's RPS compliance requirements...

MDV-SEIA weighs in on DC's investigation into interconnection standards. [MDV-SEIA advised](#) the DCPSC on September 1 that its members have reported delays in the registration of systems with PJM GATS; these delays have caused a measurable financial impact on their member-companies and customers, as well as hindering DC's ability to meet its RPS...

Maryland electric cooperatives seek FERC review of Community Solar rules. Southern Maryland Electrical Cooperative and Choptank Electric Cooperative filed a petition with FERC on August 23 for review of the new community solar regulations promulgated by the MDPSC. The cooperatives allege the regulations do not comply with federal law....

Comments continue to be filed in the PAPUC's review of its Tier 1 resource calculations for utilities and suppliers. Parties are disputing how to handle the calculation error discovered by the PAPUC earlier this summer. A number of parties filed comments between August 29 and 31 that opposed putting the obligation to procure the suppliers' shortfall of credits on the utility - and expressed preference for the option to delay the true-up period to give suppliers the time to make up the shortfall of credits. Competitive suppliers, on the other hand, expressed strong support for using a nonbypassable surcharge collected by the utilities to make up the shortfall. Other suggestions include a delay of the supplier's new AEC obligations as a result of the error and a proposal that the adjusted percentages only apply prospectively for the 2017 energy compliance year since the error was the PAPUC's...

Pennsylvania's Alternative Energy Portfolio Standards Act (AEPS) met with disapproval. Lancaster County Solid Waste Management Authority and East Lycoming School District each filed comments earlier this month with Attorney General urging the AG to disapprove implementation of the PAPUC's regulations modifying the AEPS. The proposed changes, were rejected twice by the Independent Regulatory Review Commission. Because the legislature failed to endorse the IRRRC's opposition, however, the PAPUC has the authority to move forward with implementing the regulation; only the Attorney-General now stands in the way...

New Jersey - Electricity - Distribution Rates

Reference No.	Description	Why It Matters	Most Recent Action	Next Action
<p>BPU Docket Nos. ER16050428, E016060524</p> <p><i>Opened on 06/16/2016</i></p>	<p>Electric utility Rockland Electric Co. (RECO) filed a distribution base rate case, seeking a \$9.644 million increase in distribution rates, which represents a 13.5% increase in order to achieve an overall rate of return of 7.79%.</p> <p>RECO is also proposal to install AMI infrastructure and smart meters throughout RECO's entire service territory, covering parts of Bergen, Passaic and Sussex counties RECO would begin deployment of AMI infrastructure and smart meters in 2017 and finish this deployment by year-end 2019. RECO would be installing approximately 73,880 electric smart meters which would gather meter usage data measured in 5 minute intervals for commercial meters, and 15 minute intervals for residential meters, all of which will be delivered in near real time, i.e., every 15 minutes.</p>	<p>Distribution rate cases can be significant opportunities for retail suppliers to raise issues of concern, particularly during settlement negotiations.</p> <p>The deployment of smart meters could allow suppliers to offer value-added services to customers, including time-of-use rates.</p>	<p>BPU issued order (6/29/16), bifurcating the case into a standard distribution rate case and a proceeding to consider the smart grid/AMI petition raised by Rockland. The smart grid/AMI case will be presided over by Commissioner Chivukula while the distribution rate case will be handled by an administrative law judge as per usual.</p>	<p>Awaiting next action.</p>

New Jersey - Energy Efficiency

BPU Docket No. AX16020100 <i>Opened on 07/29/2016</i>	As part of its (slow-moving) transition to a new e-filing system, currently in a pilot phase, the BPU is considering waivers to exist regulations which require submission of 10 paper copies of all pleadings as well as prohibit the entering of an electronic filing into the formal record of a case.	The BPU's lack of an electronic filing system makes tracking and participating in proceedings difficult for parties. This proceeding is a good indication that progress is being made on moving the pilot program to full deployment.	BPU issued order approving the waivers (7/29/16).	The BPU plans to convene a stakeholder process to discuss additional rule changes that will be required for full implementing of e-filing.

NJ Utilities SREC II Financing Program <i>Opened on 12/17/2015</i>	Utilities Atlantic City Electric, Jersey Central Power & Light, and Rockland Electric Company have issued a Request for Proposals (“RFP”) to select solar projects with which to enter into contracts for the purchase of SRECs.	Opportunity to sell SRECs in the NJ market.	SREC-II program manager issued notice of schedule change (8/15/16).	A BPU order is now expected at the 9/23/16 BPU meeting (previously was 8/24/16), to approve the Round 4 winners. The Round 5 solicitation is expected to be issued shortly after the 9/23/16 meeting.

BPU Docket Nos. Q016040352 and Q016040353 <i>Opened on 05/31/2016</i>	BPU Clean Energy Staff has made its annual straw proposal, recommending the funding level for FY17 to be \$344.645 million, the same level as FY16. Proposed programs include: residential energy efficiency (including HVAC), low income customer energy conservation, commercial and industrial energy efficiency, state building energy efficiency, economic development initiatives (including Edison Innovation Clean Energy Manufacturing Fund, Green Growth Fund, and Large Scale CHP program), distributed energy resources (including CHP/fuel cells, biomass, and microgrid), and the SREC registration program.	Insight into FY17 clean energy programs managed by the state.	The BPU issued a notice (8/24/16). The BPU responded to Bloom Energy, notifying Bloom that the BPU intends to continue its review of Bloom's request for reconsideration regarding a portion of the 7/29/16 order, beyond the sixty-day time period. The BPU noted that Bloom's notion for reconsideration will not be deemed denied, and will remain open pending the BPU's issuance of a final decision upon the completion of its review.	Awaiting next action.

Assembly Bill A3746 (McKeon) <i>Opened on 05/19/2016</i>	<p>This bill expands net metering aggregation to all customers and provides a credit for excess electricity generated by net metering aggregation customers at the full retail electricity rate. Under current law, net metering aggregation is only available to a customer that is a State entity, school district, county, county agency, county authority, municipality, municipal agency, or municipal authority. In addition, under current law, net metering aggregation customers are credited for the excess electricity they generated at the lower, wholesale electricity rate. The wholesale electricity rate is the rate at which a basic generation service provider or electric power supplier purchases electricity. The full retail electricity rate is the rate at which an electric power supplier or electric public utility sells electricity to its customers.</p>	<p>Net metering aggregation allows customers with multiple meters (e.g., a corporate campus with multiple buildings) to use excess electricity generated behind one of its meters to offset usage behind another of its meters. For larger customers, allowing net metering aggregation improves the economics of distributed generation.</p>	<p>Introduced and referred to Assembly Telecom and Utilities Committee (5/19/16).</p>	<p>Awaiting committee action.</p>

New Jersey - Renewable Energy

BPU Docket No. E016050412 <i>Opened on 05/10/2016</i>	<p>PSE&G filed petition for approval by the BPU of an extension of its "Solar 4 All" program, which the utility says would result in the addition of 100MW of new solar capacity constructed in New Jersey over the next four years. the focus would be on building capacity on landfill and brownfield sites in the state. PSE&G is seeking recovering of almost \$300 million over a five-year period. According to the utility, "the NJBPU initially approved the program in 2009 for 80MW-dc and extended it in 2013 for an additional 45MW-dc of solar capacity. The program currently has 115MW-dc in service through 174,000 pole attached solar units and 28 centralized solar projects, which is enough to power just over 18,000 average-size homes annually. The remaining 10MW-dc of the currently approved 125MW-dc total will be in service by the end of 2016."</p>	<p>PSE&G connects solar to the grid on behalf of all ratepayers, effectively creating a situation in which it is acting as a generator and getting full cost recovery from ratepayers. This program, while in force for several years, nevertheless remains a concerning example of skewed competitive markets that favor utilities over third-party suppliers.</p>	<p>PSE&G filed petition (5/10/16).</p>	<p>Awaiting next action.</p>

Reference No.	Description	Why It Matters	Most Recent Action	Next Action
BPU Docket No. Q016080781 <i>Opened on 04/19/2016</i>	Petitions by NJ utilities and third party suppliers asking the BPU to extend the NJ RPS compliance requirement deadlines for Energy Year 2016 (EY2016).	Retail suppliers must demonstrate compliance via REC and SREC retirement with the state RPS on an annual basis; these petitions, if granted, would extend the deadline for compliance for this year only.	The BPU issued an order (8/24/16) that extends from 10/1/16 to 11/1/16 (1) the deadline for submission of those parts of utilities' and suppliers' EY16 annual reports that cover solar energy RPS obligations; (2) the deadline for reporting compliance with Class I and Class II RPS requirements; and (3) the retirement deadline for EY16 RECs and SRECs. Additionally, utilities suppliers must enter their adjusted retail sales number in the GATS system's "My RPS Compliance Report" in the column entitled "RPS Load" by 10/1/16. If this number is adjusted, the utility or supplier must also report its final retail sales amount to the Office of Clean Energy along with a written explanation for the difference and supporting documentation.	Compliance demonstration is now due by 11/1/16, not 10/1/16.

Senate Bill SB984 (Smith, Bob) <i>Opened on 02/04/2016</i>	<p>This bill establishes a Solar Roof Installation Warranty Program within the New Jersey Economic Development Authority. The purpose of the program is to provide a source of indemnification to commercial, industrial, and institutional building owners who install solar photovoltaic equipment on their building roofs but are unable to obtain sufficient warranty coverage against damage to those roofs resulting from such installations.</p> <p><i>Cross-filed with Assembly Bill A2446.</i></p>	Provides assurance to property owners concerned about the risk from rooftop PV installations.	<p>Passed by the Senate, 23-11 (2/11/16).</p> <p>S984 was received in the Assembly and referred to the Assembly Telecommunications and Utilities Committee (2/16/16).</p>	S984 is awaiting a hearing in the Assembly Telecommunications and Utilities Committee.
Assembly Bill 1672 (Schaer) <i>Opened on 01/27/2016</i>	<p>This bill establishes the "Neighborhood Solar Energy Investment Program," effectively allowing community solar projects. Consumers that seek to invest in a solar project would be compensated by a bill credit (kWh), provided that the credit could not exceed 100% of the customer's previous year annual usage.</p>	Would allow the development of community solar projects in New Jersey, though the bill leaves a number of key policy decisions unmade and left to the BPU.	Reported favorably from the Assembly Telecommunications & Utilities Committee (2/4/16).	Awaiting Senate floor vote.

Assembly Bill A2217 (Eustace, Benson) <i>Opened on 01/27/2016</i>	<p>Would require an electric utility to enter into long-term (10-20 year) contracts for the purchase of Class I renewable energy certificates (RECs). The Class I RECs purchased would be equal to:</p> <ul style="list-style-type: none"> • 10 percent of the Class I RECs that the electric utility is required to purchase in energy year 2016; • 20 percent of the Class I RECS that the electric utility is required to purchase in energy year 2018, and • 30 percent of the Class I REC that the electric public utility is required to purchase in energy year 2020 and in every energy year thereafter. <p>Any cost or revenue loss incurred by an electric utility under these requirements would be recoverable in base rates.</p>	<p>Mandated, long-term, rate-recoverable contracts between utilities and REC generators would significantly undermine the competitive energy market in New Jersey, but also could provide opportunities to sell RECs.</p>	<p>Introduced and referred to Assembly Telecommunications and Utilities Committee (1/27/16).</p>	<p>Awaiting committee hearing.</p>

New Jersey - Renewable Energy

Assembly Bill A1759 (multiple sponsors) <i>Opened on 01/27/2016</i>	<p>Would increase state RPS requirements, Class I renewable energy requirement would increase once every five energy years between energy years 2015 and 2050, from 11% to 80%. The bill also requires a certain percentage of the electricity sold to be from solar energy; by energy year 2030, 13.849%.</p> <p><i>Cross-filed with Senate Bill S1707.</i></p>	<p>Would significantly increase RPS obligations for suppliers.</p>	<p>Introduced and referred to Assembly Telecommunications and Utilities Committee (1/27/16).</p>	<p>Awaiting committee hearing.</p>
Senate Bill S612 (Addiego) <i>Opened on 01/27/2016</i>	<p>This bill provides priority status to a solar generation system that is installed on the property of a NJ state or municipal entity (including school districts).</p> <p><i>Cross-filed with Assembly Bill A1686.</i></p>	<p>Would be a boon for projects that are for public customers, but could put significant blockages in the queue for interconnection by residential systems.</p>	<p>Introduced and referred to Senate Energy & Environment Committee (1/12/16).</p>	<p>Awaiting committee hearing.</p>

Assembly Bill A594 (Lagana) <i>Opened on 01/27/2016</i>	<p>This bill amends current law concerning the exemption from taxation of property with a renewable energy system serving onsite buildings to establish a uniform property tax exemption rate for “commercial renewable energy systems,” defined in the bill as systems producing renewable energy onsite for uses other than to provide the electrical, heating, cooling, or general energy needs of onsite residential, commercial, industrial, or mixed use buildings. Under the bill, real property on which a certified commercial renewable energy system is located is exempt from property taxation, and instead is subject to a uniform tax rate.</p> <p><i>Continued on next page...</i></p>	<p>Relates to property taxation of commercial renewable energy systems.</p>	<p>Introduced and referred to Assembly Telecommunications & Utilities Committee (1/27/16).</p>	<p>Awaiting committee hearing.</p>

Assembly Bill A594 (Lagana) (cont.)	The bill provides that the property have an assessed value equal to the assessed valuation of the real property without the commercial renewable energy system included, with the assessment due for the commercial renewable energy system calculated as follows: \$7,000 for each 1,000 kilowatts of direct current capacity, or its equivalent, for the first year of commercial operation of the system, increasing by one percent in each subsequent year of commercial operation and until decommissioning of the system. The bill does not apply to commercial renewable energy systems that were commercially operational or conditionally approved by the Board of Public Utilities prior to the date of enactment of the bill.

Senate Bill S684 (Rice) (Gill) <i>Opened on 01/12/2016</i>	<p>Establishes the Clean Energy Technology Center and Alternative and Clean Energy Investment Trust Fund for purposes of creating clean energy-related employment opportunities; allocates revenues from societal benefits charge to support its activities.</p> <p>“Clean energy” means any advanced technologies that reduce or eliminate the use of energy from non-renewable sources, including, but not limited to: energy efficiency, demand response, energy conservation and solar, wind, water, biomass, alcohol, wood, fuel cells, and any renewable, non-depleting, or recyclable fuel.</p>	<p>Financing mechanism via loans and loan guarantees to companies, universities, and nonprofits to encourage the creation of clean technology ventures.</p>	<p>Reported favorably out of the Senate Environment and Energy Committee with Amendments (5/2/16). The Senate committee amendments add a public member to the board of directors to represent the interests of electric public utility ratepayers. The amendments would also delete specific language regarding the availability of trade secrets and certain commercial or financial information in the records compiled by the center as that information is already excluded from the definition of a “government record,” commonly known as the Open Public Records Act.</p> <p>Referred to the Senate Budget and Appropriations Committee (5/2/16).</p>	<p>Awaiting the scheduling of the Senate Budget and Appropriations Committee hearing.</p>

Town Center DER Microgrid Feasibility Study <i>Opened on 07/29/2016</i>	BPU issued an order on 6/29/16 establishing the Town Center DER Microgrid Feasibility Study incentive program and budget.	State interest in increasing the use of microgrid technologies to improve the grid's resiliency and reliability in the event of a major storm.	Stakeholder meeting held (8/23/16).	Awaiting next action.

New Jersey - Renewable Energy - RPS

Reference No.	Description	Why It Matters	Most Recent Action	Next Action
NJBPU Docket No. Q016080781 <i>Opened on 08/10/2016</i>	In the matter of the New Jersey RPS request for BPU action extending NJ RPS compliance deadline for energy year 2016. The compliance true-up period commences immediately after the end of the energy year (5/31), and ends on 10/1. Each retail electric supplier and Basic Generation Service provider with retail sales in New Jersey during the EY must submit an annual compliance report to the BPU by 10/1 of each year, demonstrating that it has complied with the RPS for Class I, Class II, and solar renewable energy. The Annual Reports for Energy Year 2016 are therefore due on 10/1, 2016. The Annual Reports must demonstrate how compliance with the RPS was achieved by including the total number of megawatt-hours of electricity sold to retail customers, Solar Renewable Energy Certificates and Renewable Energy Certificates retired, and Solar Alternative Compliance Payments and Alternative Compliance Payments paid.	Once filed with the BPU, suppliers' and Basic Generation Service Provider's annual RPS compliance reports may provide intelligence on wholesale and retail solar electricity sales.	Retail Energy Supply Association (RESA) requested a one-month extension of the deadline, for the annual RPS compliance report, giving similar reasons as the EDCs (8/4/16). RESA, however, contends that since the SREC calculations are much simpler (based on percentage of sales), RESA requests only a 30-day extension to 11/1/16 for suppliers. BPU issued an order (8/24/16). The BPU finds that it is reasonable to extend the time for submission of those portions of EY16 Annual Reports that cover solar energy obligations to 11/1/16. The BPU also finds that the thirty-day extension (from 10/1 to 11/1) is reasonable and will provide the EDCs and suppliers with sufficient time to comply with the solar portion of the RPS reporting requirements, while not unduly delaying the completion of transactions for EY16. <i>Continued on next page...</i>	Suppliers and BGS providers have until 11/1/16 to file their annual RPS compliance reports.

New Jersey - Renewable Energy - RPS

Reference No.	Description	Why It Matters	Most Recent Action	Next Action
NJBPU Docket No. Q016080781 (cont.)			The BPU also finds that extending the date for reporting compliance with Class I and Class II RPS requirements to 11/1/16 will further administrative efficiency and eliminate needless duplication of effort. Lastly, the BPU finds that the thirty-day period recommended by Staff for the BGS providers and the suppliers to review the numbers in GATS "My RPS Compliance Report" is reasonable. The BPU directs the BGS providers and suppliers to work with Staff to make the reporting process faster and more efficient. The BPU anticipates that such a process will make it unnecessary for the providers and suppliers to request extensions in future Energy Years.
