

Delaware Update

SB33 Solar RPS Requirement

DE Annual Installation Volume (MW)

Delaware Update

Net Metering

- Net Metering 1.5 in place; raises cap to 8% of capacity from 5%
- Net Metering 2.0 currently strong focus, though a long-term initiative
 - Current focus on information gathering from other states, structuring “Value of Solar” study

Segments

- Residential – up front incentive (70c in Delmarva)
- Commercial – SREC, can participate in long term price contract program
- Utility – cooperatives
- Community Solar – excluded from net metering caps...

Grid Modernization

- Delmarva as of 1/1/24 requiring IEEE1547-2018

Community Solar development continues

Each year more customers are going solar (Permission to Operates as of 7/31/22)

Delmarva Delaware Net Energy Metering

- 7,581
- 88 MW

Delmarva DE Community Solar

- 84 applications received
- 289.80 MW Total Capacity
- 3.45 MW avg capacity

Each year more customers are going solar (Permission to Operate as of 09/25/23)

Delmarva Delaware Net Energy Metering

- 8,188 applications received
- 154.2MW total capacity

Delmarva Delaware Community Solar

- 204 applications received
 - 665.9MW total capacity
- 114 active applications
 - 354.8MW total capacity

Grid constraints slowly emerging
